#### **Examiner's Amendments to the Specification**

Please amend the first paragraph on page 1, beginning with " The present application claims the benefit ...", as follows:

The present application is a divisional application of U.S. Application No. 10/141,634 filed on May 8, 2002, now U.S. patent No. 6,734,010, issued May 11, 2004, which claims the benefit of U.S. Provisional Application No. 60/289,727, filed on May 9, 2001, both of which are herein incorporated by reference in their entirety.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 5-6 are directed to a isolated human kinase of specific amino acid sequence and specifically claimed homologs thereof having kinase activity. Claimed

Art Unit: 1652

amino acid sequence is free of prior art. Further the prior art does not teach or suggest preparing such specifically claimed amino acid sequence. Hence said sequence is also non-obvious.

Since claimed amino acid sequence is both novel and non-obvious, specifically claimed homologs thereof with kinase activity are also novel and non-obvious.

**Claims 5-6 are allowed.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
